

# How the Course Progress bar works

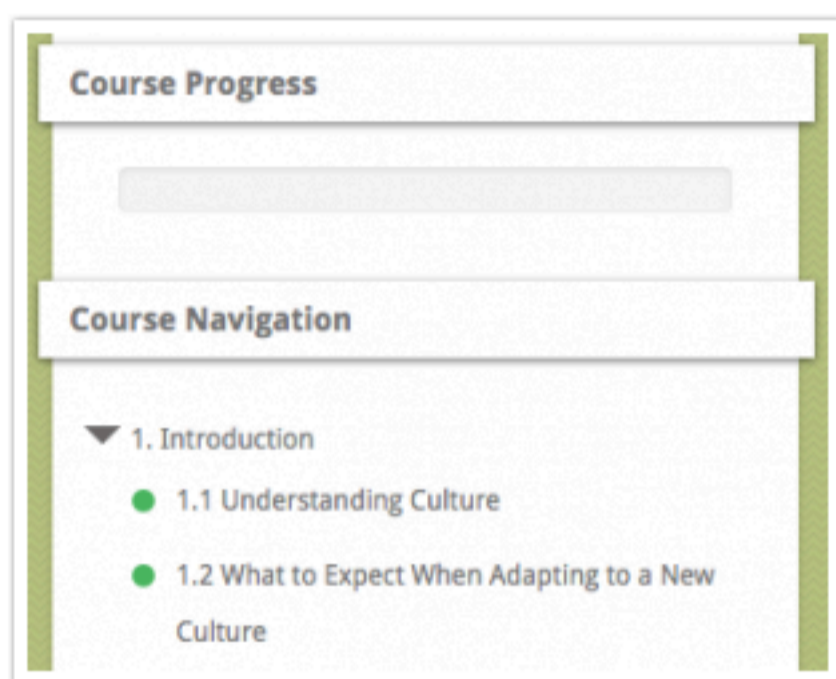

In order to see your progress and what videos and modules you have completed, it is important for you to click the “Mark Complete” button at the bottom of all video and module pages once you have finished them.

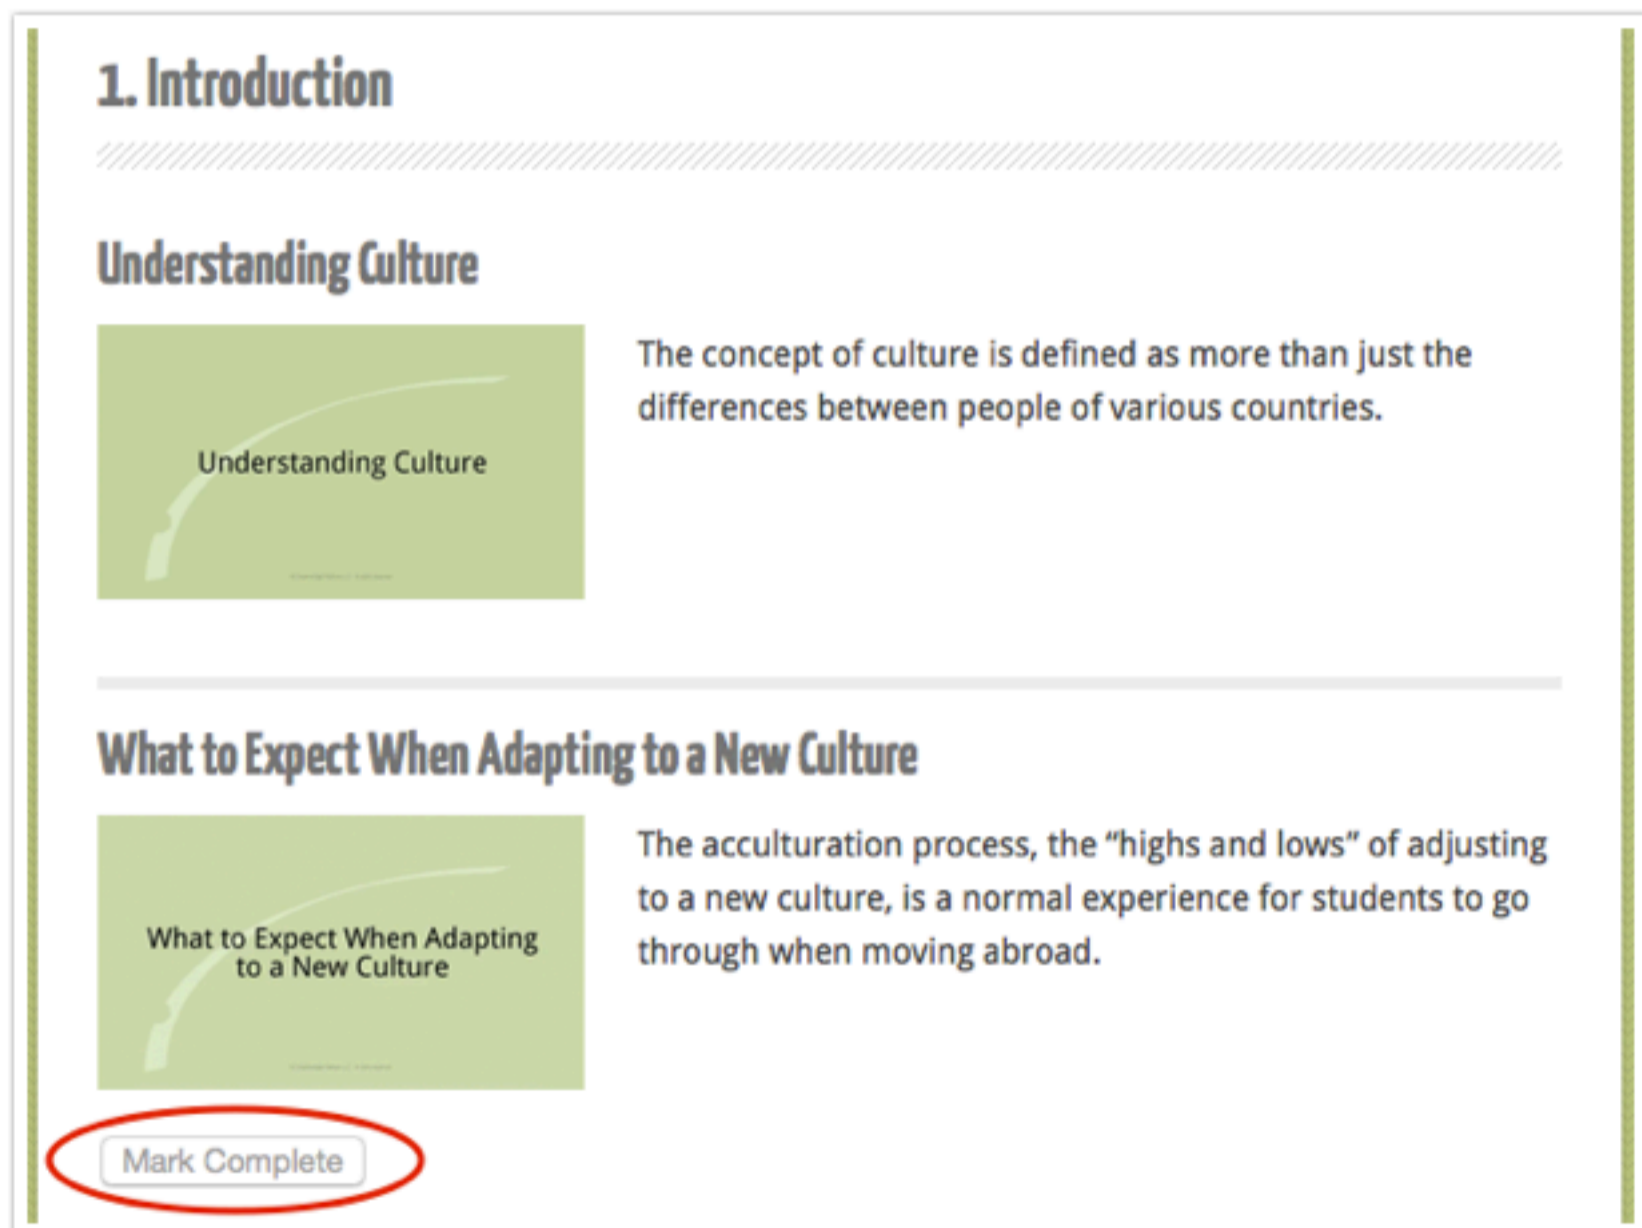

After clicking “Mark Complete” for a video you will **not** see the Course Progress bar move.

You must first mark each video within the module complete.

After marking the final video in a module complete, you will be directed to the module page where all the videos for that module are listed. There you will see that a “Mark Complete” button has appeared.

Note: this will **not** appear until each video in the module has been marked complete.

After you click on the “Mark Complete” button for the module, you will notice that the Course Progress bar has moved!
